P R E F A C E.

THE following Catalogue was made out by Order of the Honourable House of Assembly, and is likewise printed by their direction for the public use.

Care has been taken to make it answer the ends proposed, by adding references to the principal Plants. The merited acknowledgments are also made to the Gentlemen who have contributed to the Botanical Garden; and the original introduction of all the exotics are traced as correctly as possible. If I have been guilty of any omissions, or made any mistakes, I shall be glad, on a future occasion, whenever it may be deemed necessary to print a new and enlarged Edition, to make the necessary amendments.

N. B. *The Plants which have this † note prefixed to them, being lately introduced, are in an uncertain state.*
